

Assignment Task

Hinglish Translation Python Project

Introduction

The Hinglish Translation Project leverages the power of transformer architectures to translate text between English and Hinglish. Developed with the transformer library, this project offers an accurate and efficient translation mechanism for users.

Features

- Translation between English and Hinglish
- Built on a robust transformer architecture
- High accuracy and performance

Prerequisites

1. Ensure that you have Python 3.x installed. If not, download and install it from (<https://www.python.org/downloads/>).
2. Have `pip` installed. Usually, it comes with Python installation.

Installation & Setup

Follow these steps to run the program:

1. Clone the Repository

```
cd Hinglish-Translation-Python-Project
```

2. Install Required Libraries

```
Transformers and its Tokenizers
```

```
pip install transformers
```

3. Run the program
